DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in European Patent Office on 11/27/2000. It is noted, however, that applicant has not filed a certified copy of the foreign application as required by 35 U.S.C. 119(b).

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1751

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Deleo et al (6,340,663).

Deleo et al disclose a cleaning wipe for hard surfaces (col. 2, lines 5-12) wherein said wipe is impregnated with at least one layer of nonwoven material and comprises a surfactant (col. 3, lines 3-10). Specifically, said wipe is a nonwoven sheet of at least one material made of pulp, polyester, rayon, nylon, polypropylene, polyethylene and mixtures thereof (col. 3, lines 25-31). Deleo et al further include surfactants, thickeners, solvents and chelating agents (columns 5-10). Note, see Table II of a thickened formulation for the liquid cleanser.

Deleo et al does not specifically teach a dishwashing wipe, however, it would have been obvious to one of ordinary skill in the art to use said wipe on a surface such as dishes because Deleo et al teach that said surfaces are hard surfaces such as porcelain which may encompass dishes. Accordingly, the claims are considered obvious in view of the teachings disclosed in Deleo et al.
